

24 HOUR URINE COLLECTION

Specialists in Private Pathology since the 1920s

- At the starting time, empty the bladder into the toilet.
- All further urine for the next 24 hours must be passed directly through the funnel into the bottle provided.
- Record, name, DOB, and start and finish time on the label.
- Keep urine refrigerated during collection.
- Ensure that the cap is screwed on firmly before returning the bottle to the collection centre

It is important to ensure that the bottle is kept upright at all times as some bottles contain corrosive additives.

Please ask for two bottles if you think that one will not be sufficient.

For example:

6.00am Day 1

Empty bladder and discard the urine into the toilet. Pass all urine for the next 24 hours into the bottle.

6.00am Day 2

Next morning, empty bladder into the bottle. This will complete the collection.

For a full list of our collection centres and their opening hours, please visit www.qml.com.au or call your local QML Pathology laboratory.
